

Invitation to undergraduates to present a poster at the NCEO and CEOI Science Conference, Nottingham, Wednesday 4th September 2019

NCEO and CEOI will hold their annual science conference in Nottingham from 2-5 September 2019. We would like to extend an opportunity to Undergraduate and Masters Students to present a poster at the conference on Wednesday 4th September.

This would give those students the opportunity to present their work in an informal setting to specialists in the Earth Observation community. It would not only give them practice in presenting their science/technology, but also the chance to see the postgraduate work of other EO scientists. This may well act as an encouragement and incentive to pursue a postgraduate career.

Please pass on this invitation to your students. NCEO will fund 30 one-day places at the conference. If interested, students should complete this registration form and return it to comms@nceo.ac.uk by 30 July 2019.

Note that all students are offered a 50% reduction on the full conference price of £398 (=£199) for full attendance at the 3.5 day conference, including ensuite accommodation, refreshments lunches and dinners (but excluding travel).

Best wishes

John
